Triad Construction Continues to Thrive in Struggling Economy

West Allis, WI – Triad Construction was recently awarded several more construction contracts, continuing to do a brisk business despite the financial pinch being felt by the construction industry nationwide. Two of the many important construction projects Triad crews will be undertaking include a remodel to Milwaukee Area Technical College (MATC) facilities in Milwaukee and Oak Creek and an interior build-out for ESPN Milwaukee.

For MATC, Triad Construction crews will perform renovations to multiple labs, classrooms, offices, and simulation areas on the Milwaukee and Oak Creek campuses. Also on both campuses, Triad Construction will be improving and updating student accommodations. This is not the first contract Triad Construction has been awarded from MATC. Triad crews recently finished another project for MATC involving the Oak Creek campus's fire suppression system.

And to help ESPN Milwaukee move to a new location, Triad crews will perform an interior build-out to a shell space on the first floor of the Reuss Federal Building. Triad Construction will outfit the space with offices, studios, a kitchen area, gathering spaces, and restrooms as well as electrical and HVAC systems.

“We specialize in providing high quality construction work, executed in a timely and professional manner. Our steady workflow – especially in a sluggish economy – is direct evidence that we deliver what we promise,” says Triad Construction Vice President and owner Mike Long. “We’re proud to be involved in these upcoming construction projects.”

Triad Construction Inc. is a general contractor specializing in commercial construction that makes it a priority to understand customers' needs. Triad Construction has a strong history of work on new buildings, building additions, and renovations in order to meet the changing needs of the community.
